Effective Date	7/1/2025

1. Background:

The American Diabetes Association (ADA) recommends routine blood glucose monitoring in patients using insulin therapy. The ADA also notes that blood glucose monitoring may be helpful to guide treatment decisions for patients using noninsulin therapies. The ADA does not differentiate between brands of diabetic meters or test strips in their recommendation.

This program allows coverage of non-preferred test strips if utilization of a OneTouch or Contour Next diabetic meter/test strip is unsafe, inaccurate or not feasible.

2. Coverage Criteria^{a,b}:

A. Test Strips and Meters** (excluding Accu-Chek Guide, Accu-Chek Guide Me, OneTouch and Contour Next*) will be approved based on the following:

1. Submission of medical records documenting a physical or mental limitation that makes utilization of **one** of the following diabetic meters/test strips product unsafe, inaccurate or otherwise not feasible (e.g. manual dexterity):
 - a. OneTouch Ultra 2 Meter (OneTouch Ultra Test Strips)
 - b. OneTouch Verio Flex Meter (OneTouch Verio Test Strips)
 - c. OneTouch Verio Reflect Meter (OneTouch Verio Test Strips)
 - d. Contour Next One Meter (Contour Next Test Strips)
 - e. Contour Next EZ Meter (Contour Next Test Strips)
 - f. Contour Next Gen Meter (Contour Next Test Strips)

Authorization will be issued for 12 months.

- ^a State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.
- ^b In Florida, Maine, Tennessee, and Texas only, diabetes medications may be approved based on both of the following: 1) Provider attests use of this product is medically necessary; and- 2) If applicable, clinical characteristics exist that preclude the use of the covered preferred alternative(s) and use of the covered preferred alternative(s) could result in worsening of patient's condition or inadequate treatment (document alternatives and clinical information related to worsening/inadequate treatment).

3. Additional Clinical Rules:

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.
- Supply limitations may be in place.

*Accu-Chek Guide Meter, Accu-Chek Guide Me Meter, Accu-Chek Guide test strips, Contour Next test strips, Contour Next Meter, Contour Next One Meter, and Contour Next EZ Meter are covered without prior authorization/non-formulary review.

**Typically excluded from coverage.
